**POWERCRETE® DD**

**PRODUCT DATA SHEET**

**Product Information**

Product description: Powercrete® DD is a solvent free epoxy ARO (Abrasion Resistant Overly) polymer concrete coating designed to protect FBE (Fusion Bonded Epoxy) coated pipe for directional drilling, thrust (slick) bore and pull-through applications. The product is applied directly on the FBE mainline coating of a pipeline to provide a high performance protection to the system under rough terrain conditions. Powercrete® DD offers exceptional abrasion, strength, hardness, impact resistance and adhesion properties and has therefore been specified and installed successfully in many directional drilling projects as the number one abrasion resistant overlay (ARO) for over twenty years.

**Features:**
- 100% Solids Epoxy
- no VOC
- Excellent adhesion to FBE
- Excellent mechanical properties
- Superior abrasion resistance
- Widely used in directional drill and thrust bore applications.
- Suitable for pipeline operating temperatures to 55°C (130°F)
- Can be sprayed and hand applied up to 500micron (20mils) in one multi-pass layer

**Application examples**

Application: ARO coating system on top of FBE for directional- and thrust (slick) bore drilling applications and other severe abrasive pipeline applications. The product can also be used as a direct to metal (DTM) system to protect other steel substrates when abrasion is a concern.

**Application Instruction: Surface Preparation Steel**

| General | The area to be coated has to be clean, dry and free from oil, grease and dust. All contamination that could interfere with the adhesion of the coating has to be removed according to SSCO-SP1. |
| Preventing condensation on the substrate | Prior and during the surface preparation, the temperature of the substrate(s) must be at least 5°F (3°C) above the dew point. |
| Abrasive Blasting | Minimum Sa2½% (SSPC-SP10 / NACE2) . |

**Application Instruction: Surface Preparation FBE**

| General | The area to be coated has to be clean, dry and free from oil, grease and dust. All contamination that could interfere with the adhesion of the coating has to be removed according to SSCO-SP1. |
| Preventing condensation on the substrate | Prior and during the surface preparation, the temperature of the substrate(s) must be at least 5°F (3°C) above the dew point. |
| Abrasive Blasting | Sa1 (SSPC-SP7/NACE4), sweep-blasting for optimum performance. |

**Application Safety**

Read the Product Data Sheet and follow the caution statements on the Material Safety Data Sheet. Personnel who will come into contact with the product should be using appropriate protection equipment. Follow national safety guidelines.

**Application Conditions**

<table>
<thead>
<tr>
<th>Product</th>
<th>Surface</th>
<th>Ambient</th>
<th>Humidity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Optimum</td>
<td>130°F (55°C)</td>
<td>70-90°F (21-32°C)</td>
<td>70-90°F (21-32°C)</td>
</tr>
<tr>
<td>Minimum</td>
<td>122°F (50°C)</td>
<td>50°F (10°C)</td>
<td>35°F (2°C)</td>
</tr>
<tr>
<td>Maximum</td>
<td>140°F (60°C)</td>
<td>180°F (82°C)</td>
<td>120°F (49°C)</td>
</tr>
</tbody>
</table>

* If the surface to be coated is below 10°C (50°F), preheating of the substrate is recommended. Preheat temperatures should not exceed 82°C (180°F). Prior and during the application, the temperature of the substrate must be at least 3°C above the dew point.

**Application Instruction: Plural Component Spray**

**Step 1** Mix the Part A and B until uniform in consistency.

**Step 2** Use only heated plural component Airless equipment capable to maintain a 9.75:1 ratio in volume and 1.25 Gallion/4.73 Liter per minute output, with heated drums, insulated (heated) hoses and minimum 170bar (2500psi.) fluid pressure for Part A and 124bar (1800psi) for Part B. Use Binks 1M Airless spray gun or equal with preferably changeable spray tips. Consult Powercrete® for specific information.

**Step 3** Part A must be heated up and maintained to a temperature of 54°C (130°F) and Part B must be heated up and maintained at 20-30°C (68-86°F). Apply Powercrete® DD in the recommended DFT. Use a WFT gauge to check. Do not dilute the product.

**General Product Information**

| Colour | Tan and Black |
| Finish | Gloss |
| Primer | Self-priming on FBE and DTM |
| Dry Film Thickness | 20mils (500micron) for most applications |
| Coverage Rate (theoretical) | 81.5 sq.ft/USG at 20mils (500micron)/DFT. 2.00m²/l at 20mils (500micron)/DFT. |
| Volume Solids | 100% |
| VOC Content | 0 g/L |
| Flash Point | >199°F (>93°C) mixed product |
| Mixing Ratio | 9.75:1 (A to B in volume) 100:5.5 (A to B by weight) |
| Potlife | 22 minutes at 25°C (77°F) |

### Curing Times at 25°C (77°F)

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gel Time</td>
<td>39 minutes</td>
</tr>
<tr>
<td>Dry time</td>
<td>2.5 hours</td>
</tr>
<tr>
<td>65 shore D:</td>
<td>7.75 hours (ready for Holiday test)</td>
</tr>
<tr>
<td>75 shore D:</td>
<td>10 hours (full cure)</td>
</tr>
</tbody>
</table>

Cure time is based on 40 mils (1000micron) DFT. Recoat interval at 21°C (70°F) is 30-120 minutes and 10-15 minutes at 65°C (150°F).

### Inspection and Repair

**Inspection**
- The finished coating must be visually inspected for any defects, such as runs and sags, fisheyes, blistering, pinholes, missed spots and possible contaminants. Pinhole/Holiday detection must be generated according to NACE SP0188.

**Coating Thickness**
- The coating thickness (DFT) must be within the specified DFT range. Use calibrated equipment and measure according to SSPC-PA 2 or other specified standard.

**Repair**
- Pinholes/Holidays must be located and repaired with approved material. Consult Powercrete® for specific information. Retest the repaired area.

### Cleaning

**Cleanup**
- Use Acetone or MEK.

### Handling

**General**
- Transport and stacking is possible after full cure of the coating and generating a Holiday test (NACE SP0188). This time can be reduced by increasing the curing temperature. Consult Powercrete® for specific information.

### General Order Information

**Product**
- Powercrete® DD.
- Product dimensions and contents:
  - **Drum**
    - Part A: 40 gal/151.4 l (600 lb/272.2 kg)
    - Part B: 55 gal/208.2 l (450 lb/204.1 kg)
  - **Pail**
    - Part A: 5 gal/18.9 l (75 lb/34 kg)
    - Part B: 5 gal/18.9 l (40 lb/18.1 kg)
  - **Kit Options**
    - 1.32 gal/5 l: (20 lb/9.1 kg)
    - 0.66 gal/2.5 l: (10 lb/4.5 kg)
    - 0.26 gal/1 l: (4 lb/1.8 kg)
    - 0.13 gal/0.5 l: (2 lb/0.9 kg)
  - **Cartridges**
    - NA.

**Handling**
- Handle with care. Keep containers upright.

**Storage**
- Store indoor, clean and dry; away from direct sunlight in a cool place between 18-30°C (65-85°F). Keep from freezing. Shelf life 24 months in the original unopened containers.

---

**Additional Information**

**Documentation**
- Application instructions and other documentation can be obtained by contacting our head office or by sending email to info@corrosioncoatings.com

**Certified staff**
- Application of the described coating system should be carried out and inspected by certified personnel.
